

PRESS RELEASE

QuantaDyn Corporation Wins Joint Terminal Control Training and Rehearsal System (JTC TRS) from Department of the Air Force – Air Force Material Command.

Sterling, VA - January 6, 2016 – QuantaDyn Corporation (QuantaDyn) is very pleased to announce the award of the Joint Terminal Control Training and Rehearsal Systems (JTC TRS) contract by Department of the Air Force – Air Force Material Command.

Under the contract QuantaDyn will initially install and support two JTC TRS devices, with additional options for 30 more devices. The devices will be used in support of Joint Terminal Attack Controllers in the performance of Terminal Control, Terminal Guidance, Close Air Support and Joint Fires operations training for the Combat Air Force (CAF), Special Operations Command (SOCOM), Air Force Special Operations Command (AFSOC) and Tactical Air Control Party (TACP).

QuantaDyn's President, Bill Dunn said *"We are very proud to be delivering the JTC TRS to the US Air Force which leverages and extends our existing joint fires simulation and training products and services, including our Advanced JTAC Training System (AJTS). This positions us to be the world leader in the delivery of JTAC Training Systems."*

About QuantaDyn Corporation

QuantaDyn Corporation supplies simulation and training systems to the U.S. military and coalition partners around the world. Our goal is to provide modern, innovative answers to training needs, while taking full advantage of commercial-off-the-shelf (COTS) technology. Our experience includes virtually all phases of training device development for Joint Fires as well as both fixed and rotary wing aircraft for use on military and commercial programs. www.quantadyn.com
